## Discover the Science of Radiant Skin

Crafted in Korea — a global leader in innovative skincare — BYRYZN Opuluxe V brings together cutting-edge ingredients and advanced cosmetic science to help support skin vitality, hydration, and visible radiance.

This professionally applied cosmetic formulation reflects the highest standards of Korean skincare innovation.

## What Makes BYRYZN Opuluxe V Special?

A Comprehensive Blend of 8 Advanced Cosmetic Ingredients.

- **PLLA**  
Supports firmer, smoother-looking skin
- **PDRN (Trout DNA)**  
Enhances visible skin vitality and texture
- **Glutathione**  
Antioxidant that promotes a brighter, more even-toned appearance
- **Hyaluronic Acid**  
Boosts hydration for a plump, supple appearance
- **Sphingomonas Ferment Extract**  
Supports skin barrier strength and moisture balance
- **Adenosine**  
Helps smooth surface texture and fine lines
- **Amino Acids**  
Support skin resilience and elasticity
- **Vitamins**  
Nourish and revitalise for a healthy-looking glow

## Professional Application Plan

- One vial applied every 4 weeks
- Total of 3 vials over 8 weeks
- Delivered via dermaroller or microneedling device for optimal cosmetic outcomes

## Post-Application Care

- To reduce swelling, apply a cold compress to the treated area immediately after the procedure.
- Avoid touching the treated area for at least six hours. After this period, you may gently cleanse with mild soap and water.
- Avoid direct exposure to intense heat, such as sunbathing or tanning lamps, until redness and swelling subside.

### For the Next 24-48 Hours:

- Avoid excessive alcohol consumption.
- Refrain from activities that cause excessive sweating, such as going to the gym, using saunas, or prolonged sun exposure.
